

## **MERRILL SELF-LOCKS:**

a proven management tool

1. Automatically catch animals as they feed
2. Save time catching and sorting
3. Reduce feed loss
4. Train animals for better control
5. Maximize individual animal growth

## **AVAILABLE STYLES:**

Standard  
Quick Release/Adjustable  
Auto-down  
Flat Barn Milking  
Bull  
Gates  
Bunk Mount  
Feeder Wagon Mount  
Mini-selflock for small calves

## **SIMPLE TO OPERATE!**

The cow activates the locking bar either by her forward motion or vertical neck movement when she reaches through the panel to eat.

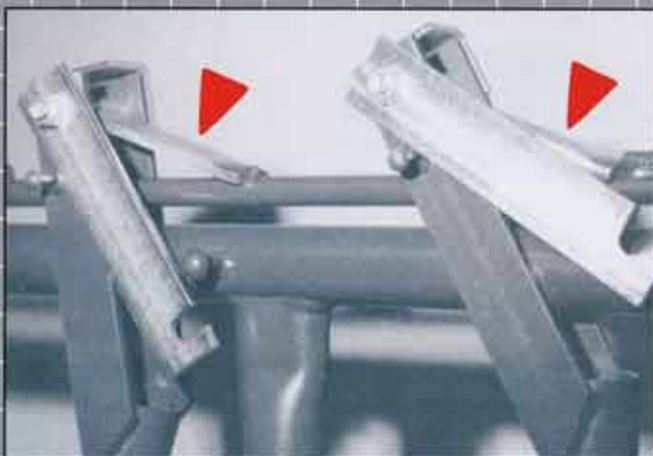

Clamp between Steel Post Mounting

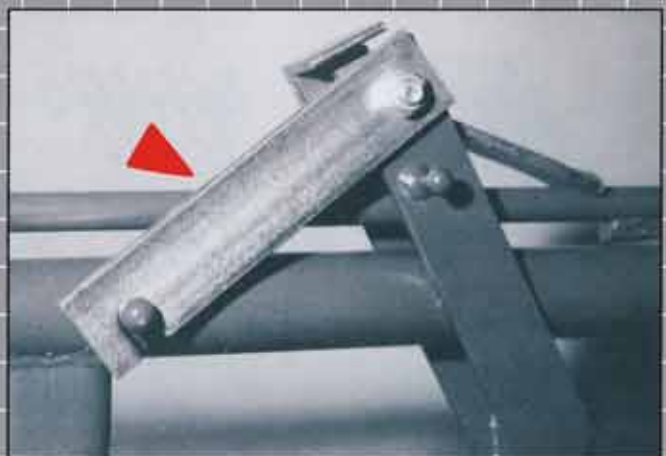

Control handle: holds or releases all animals

## **▶ TOTAL CONTROL!**

The operator can catch or release any animal at any time without affecting the rest of the animals in the system by using the triple locking mechanism.

Top lock: releases selected animals

Individual lock: holds selected animals
